

Journal of Musculoskeletal & Neuronal Interactions

Official Journal of the International Society of Musculoskeletal and Neuronal Interactions

Volume 2, Years 2001-2002, Keyword Index.

- adaptation 264
adipogenesis 71, 415
adult stem cells 309
aging 194, 201, 205, 529, 581, 584
aging gene therapy 457
aging skeleton 212
alendronate 335
AMPA 285
anabolic 222, 264
anabolic steroids 167
androgen 219
animals 501
animal models 212
antiresorptive 198
antiresorptive agents 538
apoptosis 245, 499
- basic fibroblast growth factor 9
b-catenin 274
bed rest 335
biomechanics 121, 131, 157, 201, 205, 277, 525, 527
biomineralization 532
bisphosphonates 525, 527, 538
bone 15, 121, 225, 264, 291, 327, 335, 352, 406, 423, 432, 440, 479, 529, 552, 567, 584
bone anabolic 25, 222
bone architecture 535
bone biomechanics 157
bone cancer 554
bone density 237
bone destruction 561
bone development 33
bone fluid movement 256
bone formation 3, 9, 49, 59, 77, 285, 321, 415
bone fracture 527
bone geometric properties 157
bone geometry 194, 195
bone growth 277
bone histomorphometry 469
bone mass 49, 77
bone material properties 194
bone mechanics 261
bone metastases 573, 579
bone microanatomy 194
bone mineral 532
bone mineral density 163, 220, 232, 306, 321, 463
bone mineralization proteins 521
bone pain 546
bone remodeling 59, 432, 479, 538
bone resorption 3, 49, 59, 282
bone stiffness 535
bone strain 261
bone strength 157, 205
bone structure 157
bone turnover 33
bPTH 77
breast cancer 579
- calcitonin 137, 167
calcitonin gene-related peptide 440
calcitriol 59
cancellous bone 205
cancer metastases 565
cancer predisposition 554
cancer-stroma interactions 579
cardiac 309
cartilage 501, 507, 511, 517, 524
catabolic 264
cavity 448
cell aging 71
cell cycle genes 546
cell differentiation 71
chemotherapy 549
chick 448
chicken 274
children 153, 463
chondrocyte 277, 524
chondrogenesis 71, 274
collagen 131, 201, 517, 525, 529
collagen-induced arthritis 344
commitment 268
compensatory hyperplasia 270
cortical bone 157, 302
cortical porosity 33
cross-linking 529
cyclooxygenase-2 561
cytokines 143, 504, 517
- dedifferentiation 270
densitometry 153
differentiation 268, 309
disc herniation 171
dopamine 291
Down's syndrome 457
drug resistance 549
dual-energy X-ray absorptiometry 163

dual X-ray absorptiometry 302
 EEAT-1 406
 embryogenesis 268
 epidemiology 194
 epiphyseal growth plate 344
 estrogen 195, 199, 209, 219
 estrogen receptor-b 479
 estrogen receptors 352
 ethnicity 220
 exercise 209
 extracellular ATP 432
 extracellular matrix 511, 584
 extracellular nucleotides 432

 fascia 131
 female osteoporosis 222
 finite element model 535
 fracture 194, 195, 220
 fracture healing 137

 gap junction 256
 gender 220
 gene array 575
 gene discovery 3
 gene regulation 517
 gene therapy 309
 genetics 219, 225, 232, 237, 549
 genomics 575
 GLAST-1 406
 GLAST-1a 406
 glutamate 282, 285, 423
 glutamate receptor 415
 glutamate transporter 406
 growth factors 143
 growth hormone 49
 growth plate 277

 healing 121
 hemodialysis 163
 heparan sulfate proteoglycan 511
 heredity 232
 histomorphometry 59, 321
 human tibia 157
 hyaluronan 448
 hyperalgesia 561
 hyperthyroidism 327
 hypoxia 239

 IL-1 524
 iliac biopsy 499
 immobilization 448
 impact of metastases 565
 inbred strain 232
 inbred strains of mice 225
 induction 268

 infrared microspectroscopy 532
 inherited cancer 554
 innervation 282
 insulin-like growth factor-I 167
 internal fixation of fractures 137
 in vivo 9
 irradiation-induced bone tumors 546
 isoflavones 352

 joint 121, 448, 501
 joint destruction 507

 knee 131

 lacunae 499
 leukotrienes 504
 ligament 121, 131

 male osteoporosis 222
 man 225
 matrix 524
 matrix metalloproteinase 171, 344
 mechanical influences 131
 mechanical modulation 277
 mechanical strain 239
 mechanical strength 49
 mechanoreception 242
 mechanosensation 256
 mechanostat 121
 mechanotransduction 239, 252
 men 219
 menopause 195
 menopausia 157
 mental retardation 457
 mesenchymal stem cells 309
 metastasis 561, 567
 mice 237
 micro-CT 535
 microdamage 201
 microgravity 335
 micromechanics 261
 mineral 201
 mineral analysis 532
 mineral homeostasis 239, 242
 mineralization 525
 modeling 209
 models 501
 morphogenesis 268
 motor performance 457
 mouse 511
 mouse skeleton 212
 muscle 306
 muscle anabolic 222
 muscle power 457
 myogenic 309

natural resorption 171
 nerve growth factor 327
 neuropeptides 440
 neurotransmitter 291
 nicotine 469
 NMDA 285
 NMDA receptors 282, 423
 non-invasive determination 157
 norepinephrine 327

oestrogen 143
 oestrogen receptors 143
 osteoarthritis 137, 501, 504, 507, 517
 osteoblasts 9, 15, 25, 33, 143, 264, 285, 291, 415, 432, 546, 581
 osteoclastogenesis 415
 osteoclasts 15, 143, 245, 264, 423, 432
 osteocyte lacuna 261
 osteocytes 239, 242, 245, 252, 256, 264
 osteogenesis 71
 osteogenesis imperfecta 306
 osteoid 9
 osteolysis 242, 573
 osteopenia 212, 469
 osteoporosis 15, 194, 199, 201, 212, 219, 220, 232, 352, 463, 479, 527, 529, 535, 581, 584
 osteosarcoma 546, 549, 552, 554
 osteosclerosis 573
 ovariectomy 77

P2 receptors 432
 parathyroid hormone 33, 239, 245, 252, 321, 527
 peak bone mass 302
 peptide 15
 peripheral computed tomography 302
 peripheral quantitative computed tomography 153, 157, 306
 perlecan 511, 524
 peroxisome proliferators activated receptor-gamma 581
 physiology 121
 plutonium 552
 prostaglandins 504
 prostanoid 25
 prostate cancer 567, 573, 575, 579
 prostate sparing 222
 proteomics 575
 puberty 209

quantitative microradiography 538
 quantitative trait 232

radiation 552
 radionuclides 552
 radius 153, 306
 rat 344, 469
 rat strains 321
 receptors 245

regenerative biology 270
 regenerative medicine 270
 regional osteoporosis 137
 remodeling 264, 525
 renal osteodystrophy 163
 rPTH 77

SARMs 222
 sensitization 561
 serotonin 291
 signal transduction 3, 584
 skeletal deformity 277
 skeletal metastases 565
 skeletogenesis 521
 skeleton 264
 specification 268
 spinal cord 561
 spine 205
 stem cells 270, 309, 581
 strain amplification mechanism 256
 stretch-activated channel 252
 structure to function 3
 subchondral bone 507
 subchondral osteoblast 504
 substance P 440
 syncytium 256
 synovial joint 274

tendon 121, 131, 309, 457
 testosterone 209
 thalassemia 463
 therapeutic advances 195
 tissue regeneration 309
 TNF 524
 trabecular bone 302
 transcription factor 575
 tumor suppressor genes 554, 567
 type IIA procollagen 521

uterus 479

vascular endothelial growth factor 344
 vasoactive intestinal peptide 440
 vitamin D 59
 volumetric densitometry 157
 vWFC domain 521

weight-bearing 327
 Wnt 274

X-ray diffraction 532

Journal of Musculoskeletal & Neuronal Interactions

Official Journal of the International Society of Musculoskeletal and Neuronal Interactions

Volume 2, Years 2001-2002, Volume Contents

Volume 2, Number 1, September 2001

Introduction

J.A. Gasser

Bone anabolic agents1

Editorial

R.T. Turner, M.E. Bolander, G. Sarkar, K-N An, A. Maran, E.L. Ritman

An integrated approach to assess structure-to-function relationships in the skeleton3

Review Articles

T.J. Wronski

Skeletal effects of systemic treatment with basic fibroblast growth factor9

J. Cornish and I.R. Reid

Effects of amylin and adrenomedullin on the skeleton15

Perspective Article

J.R. Hartke and M.W. Lundy

Bone anabolic therapy with selective prostaglandin analogs25

Review Articles

J.M. Hock

Anabolic actions of PTH in the skeletons of animals33

T.T. Andreassen and H. Oxlund

The effects of growth hormone on cortical and cancellous bone49

R.G. Erben

Vitamin D analogs and bone59

Original Articles

C. Halleux, V. Sottile, J.A. Gasser, K. Seuwen

Multi-lineage potential of human mesenchymal stem cells following clonal expansion71

M. Li, D.R. Healy, Y. Li, H.A. Simmons, F. Gao, H.Z. Ke, B. Lu, T.A. Owen, D.D. Thompson

A comparison of the anabolic effects of rat and bovine parathyroid hormone (1-34) in ovariectomized rats77

Abstracts from the 31st International

Sun Valley Hard Tissue Workshop (6-10 August 2001, Sun Valley, Idaho, USA)85

Letter to the Editor107

Announcements114

Volume 2, Number 2, December 2001

Harold M. Frost

William F. Neuman Awardee 2001117

Perspective Articles

H.M. Frost

Why should many skeletal scientists and clinicians learn the Utah paradigm of skeletal physiology?121

H.M. Frost

Does the anterior cruciate have a modeling threshold? A case for the affirmative131

G.P. Lyritis and P.J. Boscainos

Calcitonin effects on cartilage and fracture healing137

Review Article

G.E. Krassas and Ph. Papadopoulou

Oestrogen action on bone cells143

Original Articles

F. Rauch, B. Tuttlewski, E. Schönau

Peripheral quantitative computed tomography at the distal radius: cross-calibration between two scanners153

E.J.A. Roldán, R. Capigliani, G.R. Cointry, R.F. Capozza, J.L. Ferretti

Postmenopausal changes in the distribution of the volumetric BMD of cortical bone. A pQCT study of the human leg157

T. Nakai, K. Masuhara, K. Kato, N. Kanbara

Longitudinal measurement of bone mineral density at the radius in hemodialysis patients using dual-energy X-ray absorptiometry163

T. Saranteas, C. Mourouzis, M. Mezitis, C. Tesseromatis, C. Spyrali
Interaction between nandrolone decanoate and calcitonin in bone formation markers (osteocalcin and bone specific alkaline phosphatase) and IGF-1 in rats167

W. Meng, K. Yonenobu, K. Ariga, T. Nakase, S. Okuda, K. Obata, H. Yoshikawa

Localization of cathepsins G and L in spontaneous resorption of intervertebral discs in a rat experimental model171

Review Article

J. Rittweger and F. Rauch

What is new in neuro-musculoskeletal interactions?177

Abstracts from the 6th International Hellenic Institution of Osteoporosis Seminar

(15-16 December 2001, Athens, Greece).	181
Announcements	191

Volume 2, Number 3, March 2002

Introduction

W.S.S. Jee

The 31 st Sun Valley Hard Tissue Workshop	193
------------------------------------------------------------	-----

Osteoporosis in Women

Introduction

R.R. Recker

Osteoporosis in women	194
-----------------------------	-----

Perspective Articles

R. Marcus

An expanded overview of postmenopausal osteoporosis	195
-----------------------------------------------------	-----

S.R. Cummings

How drugs decrease fracture risk: Lessons from trials ..	198
----------------------------------------------------------	-----

D.B. Burr

Bone material properties and mineral matrix contributions to fracture risk or age in women and men	201
----------------------------------------------------------------------------------------------------------	-----

T. Keaveny and O.C. Yeh

Architecture and trabecular bone – Toward an improved understanding of the biomechanical effects of age, sex and osteoporosis	205
-------------------------------------------------------------------------------------------------------------------------------------	-----

R.B. Martin

Size, structure and gender: Lessons about fracture risk..	209
-----------------------------------------------------------	-----

Review Article

M. Priemel, A.F. Schilling, M. Haberland, P. Pogoda, J.M. Rueger, M. Amling

Osteopenic mice: Animal models of the aging skeleton	212
------------------------------------------------------	-----

Osteoporosis in Men

Introduction

E.S. Orwoll

Osteoporosis in men	219
---------------------------	-----

Perspective Articles

J.A. Cauley

The determinants of fracture in men	220
-------------------------------------------	-----

J. Rosen and A. Negro-Vilar

Novel, non-steroidal, selective androgen receptor modulators (SARMs) with anabolic activity in bone and muscle and improved safety profile	222
--------------------------------------------------------------------------------------------------------------------------------------------------	-----

Genetics and mechanical loading sensitivity

Review Article

W.G. Beamer, L.R. Donahue, C.J. Rosen

Genetics and bone. Using the mouse to understand man	225
------------------------------------------------------------	-----

Perspective Article

R.F. Klein

Genetic regulation of bone mineral density in mice	232
----------------------------------------------------------	-----

Original Article

C.H. Turner and W.G. Beamer

Is skeletal mechanotransduction under genetic control? ..	237
-----------------------------------------------------------	-----

Osteocytes: Role in cell signaling and mechanical stimulus detection in bone

Introduction

L.F. Bonewald

Osteocytes: A proposed multifunctional bone cell	239
--------------------------------------------------------	-----

Perspective Articles

D.M. Cullinane

The role of osteocytes in bone regulation: Mineral homeostasis versus mechanoreception	242
----------------------------------------------------------------------------------------------	-----

F.R. Bringhurst

PTH receptors and apoptosis in osteocytes	245
-------------------------------------------------	-----

Original Article

Y. Mikuni-Takagaki, K. Naruse, Y. Azuma, A. Miyauchi

The role of calcium channels in osteocyte function	252
----------------------------------------------------------	-----

Perspective Article

S.C. Cowin

Mechanosensation and fluid transport in living bone	256
-----------------------------------------------------------	-----

Original Articles

D.P. Nicoletta and J. Lankford

Microstructural strain near osteocyte lacuna in cortical bone <i>in vitro</i>	261
-------------------------------------------------------------------------------------	-----

C. Rubin, S. Judex, M. Hadjiargyrou

Skeletal adaptation to mechanical stimuli in the absence of formation or resorption of bone	264
---------------------------------------------------------------------------------------------------	-----

Development and tissue regeneration

Perspective Articles

G.C. Schoenwolf

Principles of developmental biology	268
-------------------------------------------	-----

D.L. Stocum

Regenerative biology and medicine	270
-----------------------------------------	-----

C. Hartmann

Wnt-signaling and skeletogenesis	274
----------------------------------------	-----

I.A.F. Stokes

Mechanical effects on skeletal growth	277
---------------------------------------------	-----

Neurotransmitter functions in bone remodeling

Introduction

T.M. Skerry

Neurotransmitter functions in bone remodeling	281
-----------------------------------------------------	-----

Perspective Article

C. Chenu

Glutamatergic regulation of bone remodeling	282
---------------------------------------------------	-----

Original Article

A.F. Taylor

Osteoblastic glutamate receptor function regulates bone formation and resorption	285
----------------------------------------------------------------------------------------	-----

Review Article
